DATE MAILED: 10/03/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

09/557,252

Applicant(s)

PAGE, JUSTIN

Examiner

Alford W. Kindred

Art Unit

2163

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 15 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 19-36 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 19-36 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

1. This action is responsive to communications: Amendment, filed on 7/15/05.

This action is made final.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 19-24, 26-28, and 30-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tibor US# 2004/0234117 in view of Westbrook et al. US# 20050050577 A1.

As per claim 19, Tibor teaches "establishing a database of known private information of one or more individuals" (see paragraph [0011]-[0012]) "establishing a database of replicated information contained in one or more databases containing stored private information of the one or more individuals" (see paragraphs [0016] and [0018]-[0019]) "establishing indicia of unauthorized storage . . . private information" (see paragraph [0034]) "persistently scanning one or more network communication systems for indicia" (see paragraph [0030] and [0035]) "recording location information of the one or more databases containing the stored private information" (see paragraph [0032]) "comparing the known private information and the stored private information; and notifying the one or more individuals when the indicia are detected" (see paragraph

[0034]-[0035] whereas Tibor's approval process includes a notifying element in a manner similar to applicant's claim language). Tibor does not explicitly teach "which may be in the one or more databases containing stored private information, without requiring initiation of the scanning through an action of the one or more individuals."

Westbrook et al. teaches "which may be in the one or more databases containing stored private information, without requiring initiation of the scanning through an action of the one or more individuals" (see paragraph [0070], [0098] and [0127]). It would have been obvious at the time of the invention for one of ordinary skill in the art to have combined the teachings of Tibor and Westbrook because using steps of "which may be in the one or more databases containing stored private information, without requiring initiation of the scanning through an action of the one or more individuals" would have given those skilled in the art the tools to scan for indexed elements in secure databases without an requirement of an user's action. This gives users the ability process privacy data in various databases more efficiently.

As per claim 20, Tibor teaches "blocking access to the stored private information" (see [0038]-[0039]).

As per claim 21, Tibor teaches "reporting unauthorized use or storage of stored private information, inaccurate stored private information or a combination of the two" (see paragraph [0043]).

As per claim 22, Tibor teaches "wherein the database of known private information and the database of replicated information form part of a common database" (see paragraph [0041]).

As per claims 23-24, Tibor teaches "notifying is performed by establishing a graphical user interface from the one or more individuals to observe one or more indicators of private information usage or storage based on the established indicia" (see paragraph [0015] and [0043]).

As per claim 28, Tibor teaches "wherein the one or more other databases are substantially continuously search for stored private information" (see paragraphs [0017]-[0021]).

As per 32, this claim is rejected on grounds corresponding to the arguments given above for rejected claim 1 and is similarly rejected including the following:

--Tibor teaches "the first database through the computer interconnection system . . ." (see paragraphs [see paragraphs [0036]-[0036]).

As per claim 36, Tibor teaches "comparing to detect differences between the known private information" (see paragraphs [0032-0033]).

As per claims 26-27, 30-31, and 33-35, these claims are rejected on grounds corresponding to the arguments given above for rejected claims 19-25 and are similarly rejected.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 25 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tibor in view of Westbrook et al., as applied to claims 1-24, 26-28, and 30-36, and further in view of Ellingson, US# 6,871,287.

As per claim 25, Tibor does not explicitly teaches "database replicated include credit reporting service databases . . . criminal record databases." Ellingson teaches "database replicated include credit reporting service databases . . . criminal record databases" (see col. 15, lines 52-67 and col. 16, lines 1-11). It would have been obvious at the time of the invention for one of ordinary skill in the art to have combined the teachings of Ellingson and Tibor above, because using the steps to "database replicated include credit reporting service databases . . . criminal record databases" would have given those skilled in the art the tools to indicate, to the appropriate agency, that fraudulent data is being processed. This greatly improves the integrity of data in a database environment.

As per claim 29, Tibor does not explicitly teach "searching is a search agent program . . . web spiders, bots, and rebots." Ellingson teaches "searching is a search agent program . . . web spiders, bots, and rebots" (see col. 3, lines 45-67). It would have been obvious at the time of the invention for one of ordinary skill in the art to have combined the teachings of Ellingson and Tibor above, because using the steps of "searching is a search agent program . . . web spiders, bots, and rebots" would have given those skilled in the art the tools to input data in search fashion and receive results from various sources. This give users the advantage of searching multiple data sources more efficiently.

***Response to Arguments***

6. Applicant's arguments with respect to claims 19-36 have been considered but are moot in view of the new ground(s) of rejection.

--As per applicant's arguments regarding "nowhere in paragraph [0030] of the Tibor reference is there any mention of persistently scanning", examiner disagrees and maintains that Tibor's teachings of continually updating in an electronic transaction verification environment, indicates a persistence of scanning in a manner indicated in applicant's claim language.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

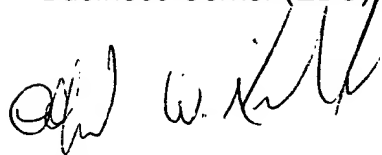

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alford W. Kindred whose telephone number is 571-272-4037. The examiner can normally be reached on Mon-Fri 9:00 am- 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Safet Metjahic can be reached on (571) 272-4023. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2163

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

A handwritten signature in black ink, appearing to read 'Alford W. Kindred', is written over the printed name.
